**\$2,999.00/Pair**

**Rosenut Wood, Gloss Black, or Satin White**

# B&W Bowers & Wilkins

## B&W 800 Series

The all-new 800 Diamond Series was a no-holds barred approach taken over an eight-year period. Every last detail was considered, in fact, there are over 800 changes done to this series. Other than the speaker binding posts and their reference diamond dome tweeters, everything was redeveloped leaving nothing on the table in terms of performance. From the all new design cabinets, new Aerofoil woofers, to the Continuum midrange drivers, replacing their iconic Kevlar design, to an all new approach with materials. This is the new reference that virtually all other loudspeakers will be compared to., with a transparent sound that brings you closer to the performance than ever possible Available in Rosewood Piano Gloss Black or White Cabinet Finishes

**800 DS**

# McIntosh

The World-Wide leader in  
Hi-Fidelity Technology

## Stereo Power Amplifier

Since 1949, no other audio company has done more to create superior sounding audio components than McIntosh. Since their inception they have developed leading-edge technologies that no other manufacturer has then or since, such as Power Guard that prevents distortion from damaging your loudspeakers, and Sentry Monitor, which prevents the amplifier from being damaged from a dead short. Hand built, not mass produced, each McIntosh amplifier is a testament to creating audio products that stand the test of time. Made to last, a McIntosh amplifier is the sound of music itself! Regardless if you are purchasing either a solid-state or vacuum tube amplifier, a McIntosh amplifier will be the best investment you can make in your audio system. From Monoblock amplifiers or a stereo amplifier, or multi-channel Home Theater, there is a perfect choice for any system.

### McIntosh MC-152 Stereo Power Amplifier

150 Watts per Channel,  
Power Guard, Sentry  
Monitor, Slim style  
-perfect for smaller  
spaces.

### McIntosh MC-312 Stereo Power Amplifier

300 Watts per Channel, Power  
Guard, Auto-Former Outputs

### McIntosh MC-462 Stereo Power Amplifier

450 Watts per Channel,  
Quad-Balanced, Power  
Guard, Auto-Former Outputs

### McIntosh MC-275VI

75 Watts per Channel,  
Vacuum Tube Design, Auto-  
Former Outputs

## McIntosh Integrated Amplifiers

Usually when a manufacturer develops an Integrated Amplifier, it is usually a compromise from their separate components in performance to obtain a certain price point. That is not the case with McIntosh Integrated Amplifiers! Built to the same high standards as their separate components, and never designed for a price point, McIntosh Integrated Amplifiers routinely out-perform separate components from other companies. While retaining core technologies and performance carried over from their separates Such as Power Guard to prevent distortion from damaging loudspeakers. The new McIntosh Integrated amplifiers, also feature High Quality DAC's or Digital to Analog converters to allow you connect various Digital sources including your computer for the best possible sound quality. More than enough inputs to assemble the most sophisticated systems, McIntosh Integrated amplifiers are built to last while delivering a musical performance that is second to none!

MA-252 Stereo  
Integrated Amplifier  
110 Watts per Channel, Vacuum Tube /  
Solid State Design, Phono Input

MA-8900 Stereo  
Integrated Amplifier  
200 Watts per Channel, Auto-Former  
Outputs, Digital Inputs/USB Input

MA-9000 Stereo  
Integrated Amplifier  
300 Watts per Channel, Auto-Former  
Outputs, Eight Band Tone Controls,  
Digital Inputs/USB Input

## CD/DVD Players

To complete your dream McIntosh stereo or Home Theater system, they offer reference grade CD and Blu-ray DVD Players to capture every nuance of music that the artist intended to ultimately deliver that to your system. Built to the same high standards as their audio components, McIntosh CD players play both CD and SACD (Super Audio CD). Super Audio CD allows you to hear what the artist originally wanted you to experience. Many audiophiles consider that SACD is the ONLY way to experience music! Ultra-High-grade 32-bit DAC's and superior laser pickups deliver every note of the performance. Their Blu-Ray DVD player is a Universal player that allows you to bring the performance home whether it's a Blu-Ray or DVD movie, or CD, SACD or DVD -Audio recording. It is a great choice for anyone who desires one machine to deliver the best in both audio and video.

### MCD-350

CD/SACD Player,  
32 Bit/DAC, 4x  
Read Speed for  
CD/2x for SACD

Blu-Ray, DVD, CD,SACD,  
DVD-Audio Player,  
4k Video Upscaling,  
RCA, XLR, HDMI Outputs.

## McIntosh Stereo Receiver

The McIntosh MAC-7200 was designed to deliver sound comparable to separate components, but in a one chassis design to save valuable shelf space. With 200 Watts per channel, featuring their patented Autoformer design will power any speaker and sound wonderful. The MAC-7200 provides you with enough inputs and the latest modern technology to keep all your music components connected and sounding great, including an ultra-high quality 32Bit/192Khz DAC for your digital sources. A wonderful sounding tuner completes this amazing receiver.

## Stereo Preamplifiers

No other audio company has the experience or know-how than McIntosh when it comes to designing the best sounding and most flexible preamplifiers! Created to offer plenty of inputs to connect all of your components, now and well into the future. Superior audio performance with patented electro-magnetic switching, for silent noise free operation while eliminating any type of routine maintenance cleaning of controls. Many of their preamplifiers include DAC's for connecting Digital devices as well, such as a computer for the best sound. They are even upgradable in the future preventing any type of obsolescence. Offering choices in both vacuum tube or solid-state, a McIntosh preamplifier will be the best choice you can make for any audio system. Built in the USA since 1949!

### C-70 Vacuum Tube

(Upgradeable in the Future), Twin Chassis Design in a  
Single Unit, Silent Input Switching, VU Meters

### C-49 Stereo Preamplifier

Solid State Preamplifier, Both MM and MC Phono Stages,  
Digital DAC Included (Upgradeable in the Future),  
Silent Input Switching

Happy Holidays

# GoldenEar Technology

A Passion for Sonic Perfection™

In the summer of 2010, Sandy Gross, co-founder of two of the most successful speaker lines in the history of the audio industry, announced the launch of a new loudspeaker company, Golden Ear Technology. Their recipe for success is simple: the best products offered only by the best specialty dealers. Featuring their rave-reviewed Ribbon Tweeter delivers a sound that's open and transparent to the music, coupled with powered woofers make for a perfect choice for any high-quality music or Home Theater system. All of their product offerings have been routinely been rave reviewed by all of the leading audio publications, and music lovers alike, and have been compared with other speaker offerings costing as much as ten or more times their selling prices.

# Sonus faber®

Sonus Faber is unique in handcrafting loudspeakers, taking an artisan approach, like a craftsman painstakingly creates a musical instrument, such as, a violin. Sonus Faber first created the Lyre style cabinet that not only looks like a work of art, but also enhances the sound quality dramatically. Only using the finest hand selected drivers, they craft loudspeakers that are musical, and engaging to listen to. If you are looking for a loudspeaker that allows hearing music, but also the emotion of the performance, this is your loudspeaker. We have three models shown here two floor standing, one bookshelf, all created by proud artisans in Italy.

**JL AUDIO**

The best way to improve the sound of your audio system is to add a subwoofer; JL Audio makes the best sounding subwoofers, and offers solutions that will fit any budget, whether Home Theater, or a Stereo system. Entirely designed, built and shipped from Miramar Florida, all JL Audio woofer drivers are of their own design, in fact, the driver found in the Fathom series has twelve patents on it! The Fathom Series also uses ARO (Acoustic Room Processing), this unique process analyzes your room acoustics and automatically adds equalization for the most accurate bass possible. Both their E-Series and Dominion Series use the highest quality drivers and amplifiers/crossovers for a tight, accurate deep bass response.
