# SPECIAL SEMINAR! "THE INFORMATION SUPERHIGHWAY and its impact on HOME ENTERTAINMENT"

Thursday May 12th, 1994 6:30 P.M. & 8:30 P.M.

The "Information Superhighway," a fiber optics network that will revolutionize communications, is almost here bringing with it countless other high-tech, revolutionary systems and products that will profoundly change our world. How will this rapid expansion of new technology affect home entertainment? For a special evening with two showings, on Thursday, May 12th at 6:30 P.M. and 8:30 P.M., come to an extremely interesting and timely Stereo Shop Seminar and meet Bob Perry (Eastern Zone Manager) and Peter Broas (New England Regional Manager) from the LCD Group of Sharp Electronics. Bob and Peter are among the best informed people in the industry and will discuss what's going on with the new fiber optics network, High Definition TV, interactive multimedia and other issues, and answer all of your questions in plain english. What about liquid crystal technology and TVs of the future—large LCD panels you can hang on a wall? Bob and Peter will bring one to show you! Will your telephone company be your next cable company? How will multiple delivery systems, direct broadcast satellite (DBS) and wireless cable systems affect your program choices? When will these systems finally arrive? How will they all be integrated? Hear and see the answers to these questions and more at this unique seminar. Please call Bob Dacundo at 523-7250 for reservations. Seating will be limited. Come early and enjoy refreshments!

#### How To Put A High End System Together

Thursday May 12th, 1994 7:30 P.M.

re there audible differences between components? What should you listen for when choosing components? What will high end equipment do? What is bi-amping? Do special cables and speaker wire really make a difference? At a special seminar for one evening only, Thursday, May 12th at 7:30 P.M., John Taylor of B&W Loudspeakers and Tor Siversen of Conrad-Johnson Design (amplifiers) will demonstrate a state-of-the-art stereo system and answer all of your questions. Seating is limited. Call Scott at 523-7250 for reservations!

#### ANALOG LIVES!

FREE
TURNTABLE CLINIC
MAY 19 - JUNE 2

any audiophiles still feel the analog vinyl LP offers excellent sound, and a lot of people own irreplaceable record collections, with many important titles out of print. If you value your vinyl records, it's time to come to The Stereo Shop and drop off your turntable for a free inspection and calibration for maximum performance for a two week period, Thursday May 19 through Thursday June 2, a \$39.95 value. We examine your needle with our Wild Heerbrugg microscope and ensure that your cartridge is mounted correctly at the proper angle. The final phase of calibration is to set antiskate and tonearm weight electronically with an oscilloscope to ensure maximum trackability and reduce needle and record wear. Don't miss out on this free opportunity to hear your records at their very best! We can also thoroughly clean your favorite records with our Keith Monks professional record cleaning machine. Only \$1.00 a record, including a complimentary archival sleeve. While you're here, check out the new VPI HW-19 Junior audiophile turntable, your ticket to analog bliss!

#### FREE TV FOR A FULL YEAR!

Through July 5th, purchase a Mitsubishi VS-4571 big screen TV and enjoy these benefits for an entire year:

NO MONEY DOWN

NO PAYMENTS

NO INTEREST

Buy a VS-4571 and apply these terms to any matching base or Mitsubishi VCR. Call now or stop in for complete details on this unbeatable offer!

#### BOB DACUNDO

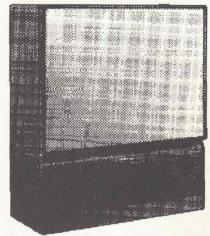

#### **AUDIO/VIDEO INTERIORS**

Never before has there been such a wide variety of new technology, high quality

options in designing your own home theater! From adding a Dolby Pro Logic surround sound system to your existing TV to creating a "media room" dedicated to state-of-the-art home entertainment. The Stereo Shop is Connecticut's custom audio/video specialist. I have many years' experience designing some of the finest installations around, and I will work closely with you, your interior designer or architect in helping to create and install a one-of-a-kind, easy-to-use system that reflects your vision and taste, and integrates perfectly with your living space, lifestyle and decor.

Recently, I have had the opportunity to examine the latest-generation products from the best firms in the industry, and became really excited when I realized The Stereo Shop could offer a truly fantastic, easy-to-use home theater with stunning performance - the very best in its class! It has a phenomenal picture, plenty of power and first-rate sound. It's an incredible system that will revolutionize the way you experience sound and vision in a total entertainment context.

Mitsubishi Diamond View VS-6081 60" Rear Projector TV This is Mitsubishi's latest-technology Big Screen rear projector, its very best TV ever, and it delivers a picture unlike any other - brighter, bigger, better, with a slimmer enclosure to take up less floor space. With its 800 lines of resolution on a 60" screen, you will feel the full drama and impact of movies like never before.

Mitsubishi VS-6081 TV: \$5,299.00

Cutting edge technology makes brightness, clarity and contrast the finest available. And perhaps best of all, the Diamond View sets retain their brightness years longer than other designs. The Mitsubishi View Point II on-screen menu system makes it easy to use all features and functions. Add the new Mitsubishi HS-U69 S-VHS hi-fi VCR with its "Active AV Network" for one-button access to your amazing TV!

Adcom GTP-600 Surround Sound Preamp/Tuner with GFA-6000 Multi-channel Power Amp

ADCOM GTP 600: \$1,000.00

The great new Adcom preamp/tuner makes the superior performance of separate components as convenient and easy to use as a receiver. Just add the new 5-channel Adcom GFA-6000 power amplifier, and you have 420

watts for a superbly balanced, high powered stage of sound so real, you can practically touch it! Not only is this the heart of your Dolby Pro Logic home theater, but it provides digital signal processing for various other music-listening modes, with variable digital delay for all kinds of special effects.

**B&W Home Theater Speakers** 

B&W DM 610i Speakers: \$500.00 per pair

One of the most respected names in ultra-refined audiophile loudspeakers introduces the perfect home theater speaker system. The B&W DM640i front and right speakers provide unrivaled front channel hi-fi music and cinema home entertainment performance. The DM600IFS for the front center dialogue channel is the perfect match for seamless cinema sound. And the DM610i rear surround speakers are ideal for creating an enveloping sound stage that will totally involve you in the home theater experience.

Call me or come in any time to The Stereo Shop, and I will be happy to answer any questions you may have. I look forward to meeting you.

Bob Wacundo

#### NICK PERFITO

## QUALITY COUNTS: SOUNDS AND LOOKS BETTER, LASTS LONGER

That's what
The Stereo
Shop has been
about since
1959, and will
always be about:

quality audio and video components that are truly superior and provide genuine enjoyment for many years. In the 90's, everyone is suddenly looking for a top quality product that will last a long time: that's good value. And that has been The Stereo Shop philosophy all along. To help you get maximum enjoyment from your music and video, we work with you to design systems that fit your needs and are here to help you again when your needs change. Small systems, multi-room installations, stateof-the-art home theaters - the same attention is given to making sure the equipment is the best at any level and that service before, during and after the sale is also the best. The equipment we offer sounds better, looks better, and lasts longer. Come in and see for yourself!

Mitsubishi VS-5081 50" TV: \$4,299.00

#### Mitsubishi Video

I am tremendously excited about the top of the line Big Screen Mitsubishi televisions we now exclusively represent: they are called "Diamond View" and they feature the latest and best video technology. Most of you know Mitsubishi has a video line, but the new Diamond View TVs are in the

absolute forefront of TV technology. They come in tube and rear projector formats and are beyond a doubt the brightest and clearest sets I have ever seen. Best of all, these sets will keep their clarity and brightness far longer than other TVs: while others lose nearly half their brightness over the equivalent of ten years' use, the Diamond View sets retain 90% over the same period! The sound of these TVs is excellent as well, with powerful amplifiers and built-in subwoofers for full, rich sound.

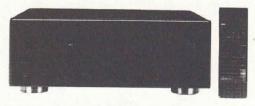

Mitsubishi CS-35701 35" TV: \$2,999.00

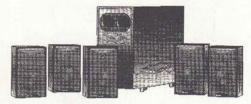

Which Diamond View TV should you consider? If you want a smaller. direct-view tube TV, the Diamond View 27" and 35" are the best. Their Diamond View tube technology sets new standards for clarity, brightness and longevity. These sets can be placed about anywhere, and are perfect for small home theater applications. For the real Big Screen, the new rear-projectors are fantastic. I am particularly amazed with their new rear-projector "table-top" TV, the 45" VS-4571, which is the first Big Screen TV you can place anywhere on a table, in a cabinet - that unobtrusively blends with your decor. And the other new rear-projector sets the floor-standing 50" and 60" TVs -

Mitsubishi VS-4571 45" TV: \$2,499.00

Onkyo TX-SV717 Surround Sound Receiver: \$969.95

Boston Acoustics Surround Speakers: \$750.00 share the same bright-screen technology that will revolutionize home viewing.

#### A Great Home Theater

Put a new Mitsubishi Diamond View TV at the center of your home theater, add a Mitsubishi VCR for one-touch TV access, a powerful Onkyo Dolby Pro Logic surround sound receiver, and the new Boston Acoustics home theater speakers. You've got an incredible system that sounds better, looks better, lasts longer...a Stereo Shop system!

Nicholas V. Perfito

President 523-7250

#### SCOTT BLAZIS

## THE STEREO SHOP FINALLY WELCOMES SPRING! (and some great new products)

Spring has come (thank God!) with a number of new products that continue the

trend of higher performance and lower and lower costs. This, coupled with continuing breakthroughs in the state-of-the-art makes for an exciting time to build a system.

#### B&W Loudspeakers: Science Serving Art

B&W Matrix 803: \$3,000.00 per pair

We can thank the British for making some of the most enduring musical loudspeakers in the world. B&W is perhaps the finest example of this heritage with state-of-the-art technology. B&W innovations such as computer-aided design, matrix cabinets. exotic materials such as Kevlar and Fibercrete have resulted in speakers that represent the preferred tools of the trade for professional recordists, and the obvious choice in the home when one wishes to hear the music as the artist intended. Come in for a listen and judge for yourself whether these speakers tell the musical truth!

#### Kimber Kable

If you're looking for some fantastic interconnects and speaker wire, Kimber Kable could be just what you need. We have been stunned with the

#### KIMBER KABLE

performance they add to our best systems, and feel they make a welcome addition to our "high-end wire act."

#### Welcome to Conrad-Johnson Premier Tube Products

Conrad-Johnson Premier 12: \$3.295.00

As Connecticut's only authorized Conrad-Johnson dealer, we feel privileged to introduce the new Premier 12 tube monoblock amplifiers. These join the Premier 10 line stage, Premier 11A power amp and Premier 9 digital to analog (D/A) converter for an all tube system of unequalled liquidity and musicality. Come in for an audition anytime.

#### New Digital Products

California Audio Labs DX-1: \$595.00

California Audio Labs introduces the next benchmark in an affordable compact disc player. At \$595.00, the DX-1 represents a breakthrough in transport quality and value for the dollar. This player is the answer for the audiophile on a budget who is dissatisfied with inexpensive Japanese machines. The Conrad-Johnson D/A-1 at \$1,695.00 is C-J's latest foray into

D/A converters, with a totally different sound than many others in its class. If you're looking for relaxed, easy-to-listen-to musicality, the C-J D/A-1 is the perfect choice. Theta Digital survived the Earthquake of '94 and has come out with a new range of products. The Data Basic transport at \$1,750.00 deserves comparison with others costing far more. Look for the Mark II versions of the Pro Basic and Pro Prime as well as the new Pro Gen V D/A converters this spring.

New Snell Speakers Snell has proved a valuable addition to our product selection and our thanks go out to the many

Snell C/V Speakers: \$2,500.00/pair

customers that have made this introduction a success. To make sure this trend continues, Snell has produced a new model, the D. This speaker sets a new standard for bass extension under \$2,000.00. It's hard to understand how Snell can manufacture a speaker this well made (2-inch thick panels!) for only \$1,699.00 a pair. We sadly bid farewell to a great speaker. the C/IV. We nervously awaited its replacement, concerned that the C/IV would be a hard act to follow. Our fears were unfounded as the C/V at \$2,500.00 a pair brings the technology developed for the Model B (\$4,799.00) into a more affordable and aesthetically pleasing package. Plus, they're even better than the C/IV's and are truly a great speaker at any price! Spoil yourself, and give them a listen!

Scott Blazis 523-7250

#### RANDY BONOMI

#### McINTOSH/SHARPVISION: THE ULTIMATE STEREO SHOP INSTALLATION

7ith The Shop's reputation as the best audio/video store in the

area, people are always asking, "Well, what is the best system The Stereo Shop can put in a house?" I'm glad that question was asked, because if you're looking for the BEST audio/video installation for the entire home, something simple to operate and convenient to use as well as being drop-dead awesome, The Stereo Shop has the answer: the McIntosh home theater/multi-room remote control system. This is the only system available that can perform as a home theater and control music throughout the home. With its special zoning package, control as many listening areas in your house as you wish at the touch of a button. Anyone in the family can watch a movie or enjoy any program in the house at any time from any location.

#### McIntosh/Sharpvision Home Theater

Imagine the ultimate movie experience in your own home! The video centerpiece is the new-technology Sharpvision XV-S80U liquid crystal front projector. This is simply the best choice for 120" super-big screen, not only because it has the best picture, but also it's so compact and

lightweight you can carry it anywhere and run it from a tabletop. It is a beautiful component that will delight you with its capabilities, ease-of-use and all-around convenience. The McIntosh C-39 Audio/Video Control Center is a preamplifier with Dolby Pro Logic circuits and six discrete channels for surround sound home theater and controls for high quality listening from any source, like compact discs, etc. The C-39 also interfaces with other McIntosh remote control components as the heart of a multi-room system! The McIntosh MC-7106 power amplifier contains three stereo amplifiers on one chassis for a total of 900 watts! Speciallydesigned McIntosh speakers for all the surround channels and subwoofers provide unmatched sonic drama and impact.

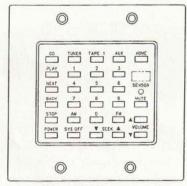

#### McIntosh Multi-Room

McIntosh C39 A/V Control Center & MC 7106 Power Amplifier

After your favorite movie on the home theater system, how about enjoying audio throughout your house at the touch of a button? You may be upstairs listening to radio or CDs while others downstairs watch a movie on the home theater or have other music programs playing. McIntosh multi-room is essentially a private stereo for every part of your home, from one central system. You can keep all the hardware, including power amplifiers, in the home theater area. The McIntosh C-39 used in the

home theater can control one other listening area, or zone, in the home, and by connecting a McIntosh CR-10 remote control center, control up to four more. You can add more CR-10s for four additional listening areas each to control as many zones as you wish! The Stereo Shop will install any kind of speaker system you like best in the listening areas, including architecturally-integrated in-wall speaker systems. Wall-mounted McIntosh keypads with infra-red sensors in each listening area bring music to any room you're in, controlling program selection and volume. You can also tune the radio and/or skip around CD tracks!

McIntosh WK-2 Remote Keypad

The incredible McIntosh remote control systems are designed to provide years of satisfying performance - not just as components, but as an investment in your home. I have many years experience installing these state-of-the-art systems, and can attest that the ultimate Stereo Shop installation will provide you and your family the finest in home entertainment for many years to come. I am always available for service, and I invite you to call me anytime with your questions.

Randy Bonomi

#### **TECH CORNER** RICHARD COX

The Night and Day Difference of Compact Disc Playback Systems

The most exciting development for dramatically improving the sound of com-

pact discs is the latest generation separate digital to analog (D/A) converters. As most of you know, most compact disc players contain both a playback transport system (CD turntable) and a digital to analog (D/A) converter. The playback transport system "reads" the compact disc and sends the digital information to the D/A converter, which converts it to the analog signals which the human ear hears as music.

Conrad-Johnson D/A 1: \$1,695.00

In the late 1980s, many compact disc player manufacturers began to offer digital outputs on their products with the idea that you can "upgrade" your sound by just adding a separate sophisticated D/A converter. If you already have a compact disc player and want to upgrade your compact disc playback system a piece at a time, you would do well to first take home a good separate D/A converter. The Stereo Shop has several excellent models by California Audio Labs, Theta, Conrad-Johnson and Krell. But to get the most out of it you should eventually get a separate transport (CD turntable) as well.

Something happened recently that made me realize this. I have often wondered why many customers

CAL Alpha D/A Converter and Delta CD Transport: \$2,390.00/ pair have taken home separate D/A converters to audition with their existing compact disc players and while many were very pleased with the difference, others were disappointed, hearing very little improvement. The other day a customer came in to purchase a D/A converter. We auditioned three of them on a reference CD turntable and he chose the one he liked best and went home. He called up to report he connected it to his CD player and did not hear the vast difference he heard at the store. I asked him to bring in his player and his D/A converter to check out. We auditioned several D/A converters with his CD player and found it was, in fact, hard to distinguish one from the other. At this point I came to realize that it was the CD turntable itself that really allowed the D/A converter to perform at its best.

Krell MD-20 CD Transport: \$4,000.00

For those of you who are interested in the technical reason why this is so, you should know that the circuitry in the playback transport in the typical compact disc player is designed to correct for discrepancies as it "reads" the disc. As the laser assembly is told to move around during error correction, it causes noise, or "jitter," and unfortunately all the digital information, music and iitter, is sent in the bitstream from the transport to the D/A converter. The D/A converter

takes all the information presented and passes it on to you, jitter and all. Since jitter is generated by the typical transport in the first place, you could hook up the most sophisticated and expensive D/A converter in the world and it still will pass on the jitter. That's why the audio industry is now beginning to emphasize the merits of the separate compact disc playback transport, where the effort is to get rid of jitter with more sophisticated drive systems. That's why, if you want to hear the very real difference a sophisticated, separate D/A converter can make in your system, you must "feed" it with the jitter-free music information that comes from a sophisticated CD turntable.

Krell Studio D/A Converter: \$3,900.00

Why not connect a good D/A converter to your existing player and judge for yourself if it makes a difference? Then, after you're ready to check out what a separate transport will do, come to The Stereo Shop and take home a model from Theta, Krell or California Audio Labs. See what I mean? Your old compact disc player can be used as a trade-in, or keep it in the family or as a backup. The improvement is like night and day.

Until Next Time,

Richard Cox

### IT'S SPRING! THE PERFECT TIME TO BRING GREAT SOUND OUTSIDE

After a hard winter, you're going to want to spend as much time outside as possible. And what better way to celebrate the season than with your favorite music in your backyard or patio? The Stereo Shop has great sounding, practically indestructible waterproof outdoor speakers that can withstand the worst weather and still play like new when the sun comes out. The Stereo Stone speaker line features enclosures that duplicate natural rock formations and blend in naturally with your landscaping! Boston Acoustics Voyagers and Runabouts can be mounted just

about anywhere, including boats of all kinds, and can be

painted to match their environment. So if you've got spring fever, and want to take your favorite music outside, the Stereo Shop can help you with outdoor speaker selection and installation.

STEREOSTONE

Boston Acoustics Roundabouts: \$200.00 per pair

Boston Acoustics Voyagers: \$400.00 per pair
